Who are we?

ABOUT

Bella Cans is a brand born from the textile cans Komteks Compressor has been producing for a long time. We have been in the market for approximately 30 years. We have quite an important place in the market whether in or out of Turkey.

Bella Cans only use polyethylene and springs that will last you long years. Our new product Self-Clean wheels are also available currently.

Besides standard measurements we also make special cans upon request. Regardless of the quantity, quality is always our priority.

1000x1070 / 1000x1200 / 1000x1300
1000x1524

1200 Cans

1200x1300 / 1200x1524

Bella Self Clean Wheels

SC-60 & SC-80

Bella Self-Clean wheels have anti-static elements in their plastic parts. Also unlike regular wheels they will not pick up any material that is being used in the can

Komteks Compressor produces them specifically upon request. They are usually preferred by many of our customers.

We also offer standard wheels.

Can Bodies & Kicking Band

We use 1st grade polyethylene in both our can bodies and kicking bands. Our anti-static cans work long years without issues.

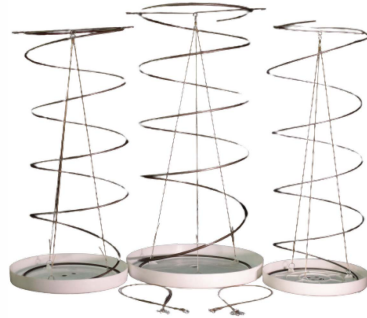

Kicking bands are recommended for the longevity of the textile cans. They can be a different color than the body itself.

Produced in accordance with your specifications.

Spring, Pre-tensioner Pantograph

Our springs all have heat-treatment qualities. Through the process called annealing the spring becomes homogenous.

400,500,600 & 700 cans have 3- rope type pre-tensioner system while the bigger cans use pantographs.

Depends on the can with varieties.

Top & Bottom Covers,Rings

400,500,600 & 700 cans top covers are produced with injection method. 800,900,100 & 1200 cans have pressurized galvanized steel.

Our upper inner rings can be SS Chrome upon request as well as regular galvanized steel. Lower rings are galvanized steel

Our bottom covers are produced in accordance with your specifications.

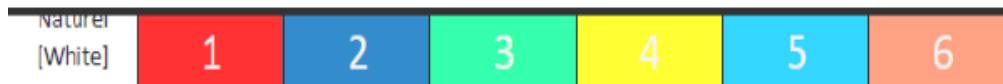

Produced in accordance with your specifications.

Cans Technical Info

Textile Bands

Body & Kicking Band

Textile band colors are available above.
